

CONCEPTUAL REVIEW CHECKLIST

Prior to the storm water review, the Owner/Developer shall submit to the Drain Commissioner or his designee the conceptual design and layout of the proposed development. The Developer/Owner shall also submit copies of the conceptual design and layout to the Township where the development is proposed for preliminary review and comment. This conceptual design and layout, at a minimum, shall include:

Each of the following items shall be included:

Small location map showing the section and part of the section in which the site is situated.

Location and description of all activities that may impact or be impacted by the proposed development or redevelopment both on and off the site.

Acreage of the total site and acreage of the area being effected by the development.

If known, a conceptual layout of the proposed drainage system for the development or redevelopment.
